

Authorised Education Specialist

Apple devices from XMA Endlessly compatible with higher education

To truly empower academics and students, higher education tech needs to fit smoothly into your institution's existing ecosystem – without compromising on creativity or efficiency.

Apple technology is ideal for higher education, packaging a suite of powerful applications into highly compatible devices. Meaning your students and staff can use the apps they love, on devices that keep everything in sync.

iPad. Unique capability. Unlimited possibilities.

iPad is so versatile, it's more than up to any task. It's your digital notepad, online classroom, work-from-anywhere office, creative studio, portable arcade and personal screening room. No matter which one you choose, iPad is a fun and powerful way to get it all done.¹

There's never been a better time to switch to Mac.

Experience the incredible performance of Mac. The game-changing power of Apple silicon, superfast SSD storage and stunning displays mean you can do more, create more and play more than ever before.

iPad and Mac for higher education: Creative, collaborative, compatible

Keeping things simple for IT teams

Whether your institution delivers remote, in-person, or hybrid education, adopting Apple technology is a stress-free operation. Apple School Manager supports zero-touch deployment, allowing your teams to set up and configure devices wherever they're located. Plus, with incredible cross-device compatibility, it's simple to migrate your institution from one platform to another.

Move from Windows with confidence

Transferring documents from Windows to Mac or iPad is easy. With Mac, the built-in Migration Assistant seamlessly transfers files and folders so users can pick up work they began on Windows, right where they left off. And with iPad, files can be moved from Windows wirelessly via the iCloud app.²

Native support for their favourite files

iPad and Mac both support the opening, editing, and saving of Microsoft Word, Excel and PowerPoint files, directly through the native Pages, Numbers, and Keynote apps. Plus, users can collaborate on these documents seamlessly and in real time, whether they're using a Mac, iPad, or Windows PC.

Keeping standards high

Industry standards support through macOS means the most common file types are all viewable on Mac. So students and staff can share documents between devices without worrying about how they'll display. And, if there are any legacy files or programmes they still need to access on a Windows interface, BootCamp on Mac allows users to choose whether to boot up their devices in Windows or macOS.³

Familiar apps for every lesson

iPad and Mac give your students access to their favourite education apps, with Microsoft Office and Adobe Creative Cloud available on both. Apple technology enhances these apps, with touch-enabled iPad keeping creative learning engaging, and Apple silicon-powered Mac boosting performance for big projects.

Integrates into your ecosystem

Mac supports almost any peripheral device that connects through USB, audio cable or Bluetooth. Meaning your institution's existing printers, external hard drives, speakers and keyboards should all be compatible with your new tech.

Access Apple Professional Services (APS) through XMA

We offer four pillars of APS – a flexible suite of solutions designed to enhance every part of your Apple tech adoption.

Prepare

We can get you ready for your rollout with an initial Health Check. Designed to assess your digital maturity, it provides us with the information we need to create your institution's optimal setup.

We can then get you started with Apple School Manager and a Mobile Device Management environment, so that you have everything you need to manage your institution's technology, now and in the future.

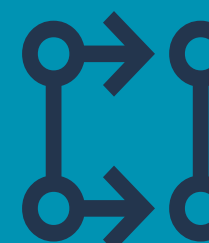

Configure

No requirement is too complex for our in-house Configuration Centre. Just let us know what your ideal setup looks like, and we'll make sure your devices are ready to go as soon as they arrive on campus.

Deploy. Secure. Manage.

Whatever the size of your institution and wherever it's located, XMA can handle its tech needs, supplying and delivering any number of devices, anywhere. We can help you automate device setup through Jamf and Apple School Manager, and keep students and staff protected with secure access and safeguarding solutions.

Productivity and collaboration

With tools like Apple Classroom and Schoolwork, your staff can collaborate on lesson plans and deliver learning experiences that exceed expectations. To help them get the most out of these apps, we provide hands-on training and support.

Get tailored Apple support from XMA

XMA has the expertise needed to oversee your entire deployment.

We're outcomes-focused Apple Authorised Education Specialists with decades of sector experience. Meaning when you buy through us, our expert team will identify your goals and keep them on track for the whole rollout.

As approved suppliers on numerous purchasing frameworks (including the Higher Education Purchasing Consortium, Wales), we can offer streamlined routes to acquisition. Combined with our APS and Apple Financial Services offering means, with XMA, you get dedicated support that's truly end-to-end.

If you want to learn more about bringing compatible Apple tech to your institution, get in touch.
